Welding Plate SPL F100 HCP

General Information

Interface element to enable a welded connection of load chains, spring hangers etc. to Beam Section TP F. Our type 'SPL universal' enables a welded connection to primary steel with flange width up to 300 mm. At the same time it's possible to install type 'SPL universal' to Beam Section TP F if a larger installation surface is needed. The welding plate can be welded directly without previous treatment due to a corrosion-resistant weld-thru coating which is compatible with both the HDG surface of the siFramo section and the health and safety requirements of the welding process.
