Safety Nut with flange NT SEC FL HCP

General Information

The Safety Nut is equipped with a self-locking head made of steel (3 parts) being arranged in a conical shape. This offers the highest possible safety against unscrewing. The Safety Nut with flange offers the following advantages: Clamping effect directly at the thread – resilient, elastic; applicable for all HCP and electrogalvanised screws and threaded rods; improved thread moving due to the separated securing segments; reusability after disassembling; high temperature resistance
