Touch-up paint ABL HT

General Information

The ABL HT spray is used to repair or embellish small areas of Sikla High-Temperature (HT) pipe shoe. It is a fast-drying, highly opaque special paint with excellent adhesion.

Installation

The surface must be clean, dry, and free of grease. Shake the can well, when the ball strikes audibly, continue shaking for approx. 2 minutes. Spray on thinly at a distance of 25 - 30 cm in a criss-cross pattern. Best processing temperature +15 °C to +25 °C.

Material Properties

Halogen-free	1
